COMPONENTS OF ASSESSMENT

Assessment

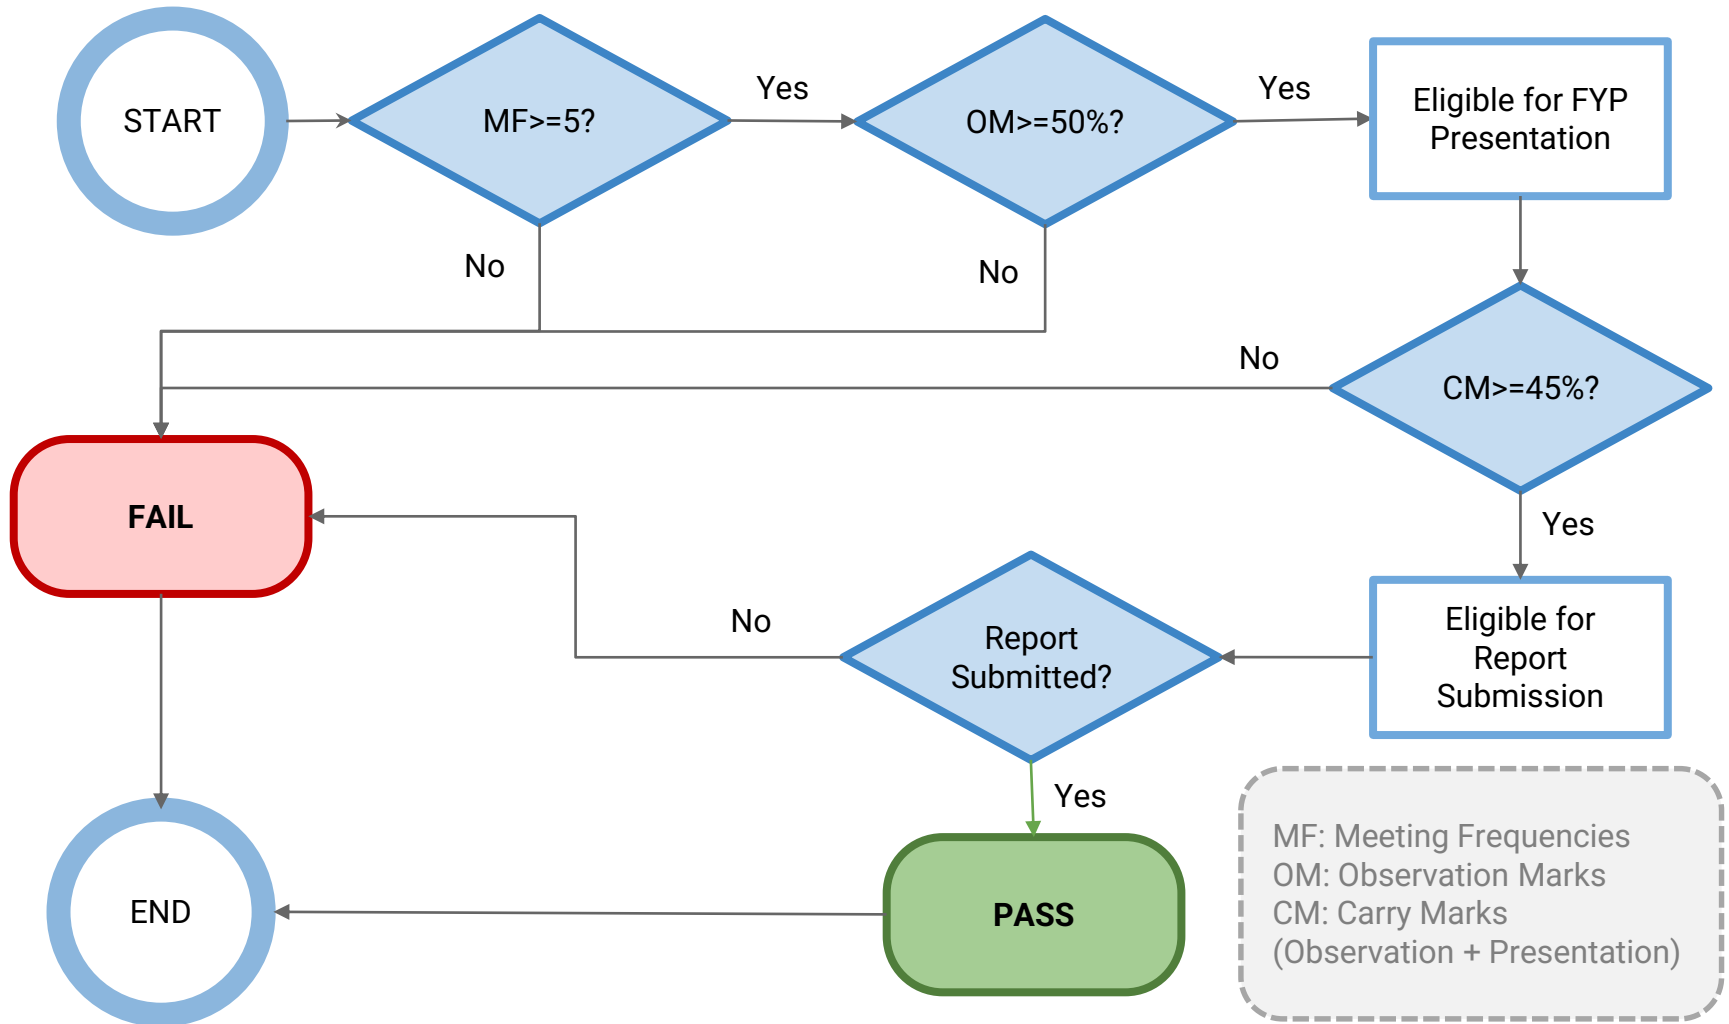

Marks Distribution

FYP II

ELIGIBILITY

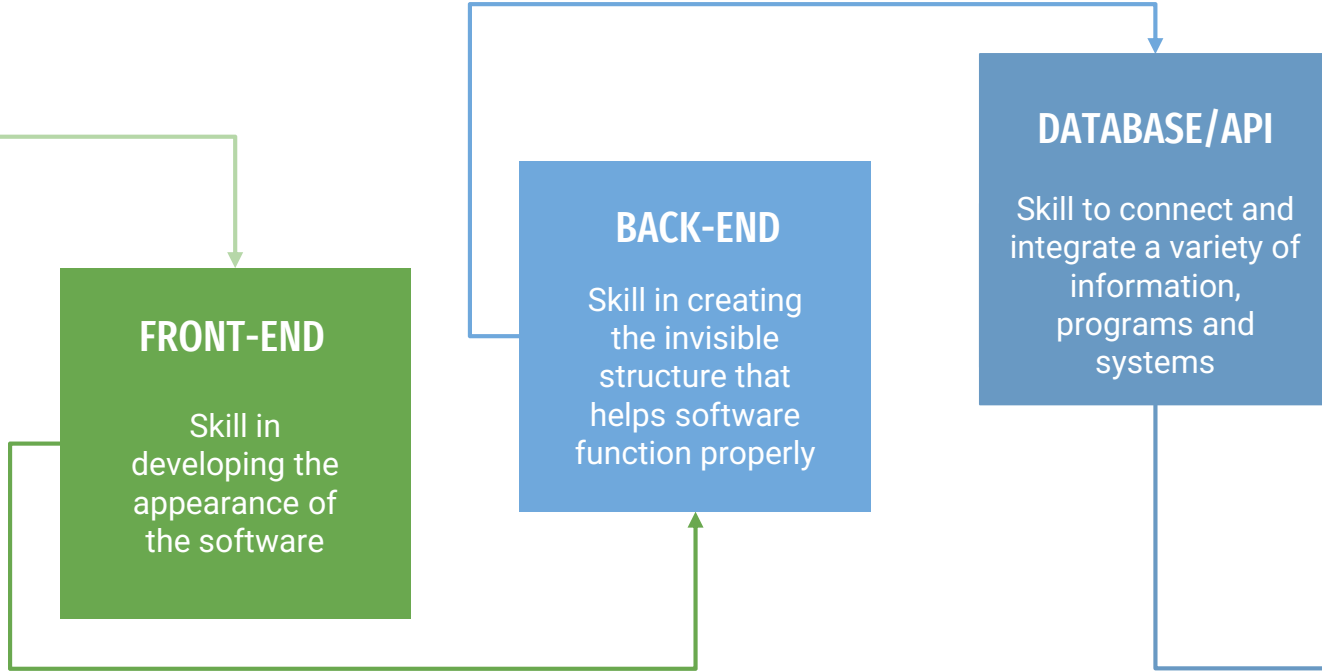

MF	OM	STATUS	PM	CM	STATUS	REPORT	STATUS
1	10/40 = 25%	FAIL					
4	22/40 = 55%	FAIL					
7	19/40 = 47.5%	FAIL					
5	20/40 = 50%	CAN GO FOR PRESENTATION	15/40= 37.5%	35/80= 43.8%	FAIL		
			16/40= 40%	36/80 = 45%	CAN SUBMIT REPORT	NOT SUBMIT	FAIL
	22/40 = 55%		14/40 = 35%	36/80 = 45%		SUBMIT	PASS

ASSESSMENT CRITERIA

		SUPERVISOR (60%)		PANEL (40%)	
		Observation (40%)		Report (20%)	Presentation (40%)
		Interim (20%)	Final (20%)		
CLO1/PL02		Project Development			
		10	10		
CLO2/PL03		Abstract & Thesis Draft		Thesis	Project Output
		5		10	25
CLO3/PL04				Writing Skill	Presentation Skill
				5	5
CLO4/PL06	Project Tracking & Logbook	Discipline		Compliance & Ethics	
		2.5	2.5	5	
CLO5/PL07			Motivation		Technology Used
			5		5
CLO6/PL08		Project Management			Project Innovation
		2.5	2.5		5

OBSERVATION

Project Management

Project Execution

The percentage of completed project.

Project Monitoring

Ability to identify problems and fix them during project execution.

Discipline

How often the student meets his/her supervisor for consultation and uses a logbook as a working document.

Motivation (*FYP II only)

How student encouraging himself/herself to continue making progress toward a goal even when it feels challenging.

01

Abstract for SRD@UMT

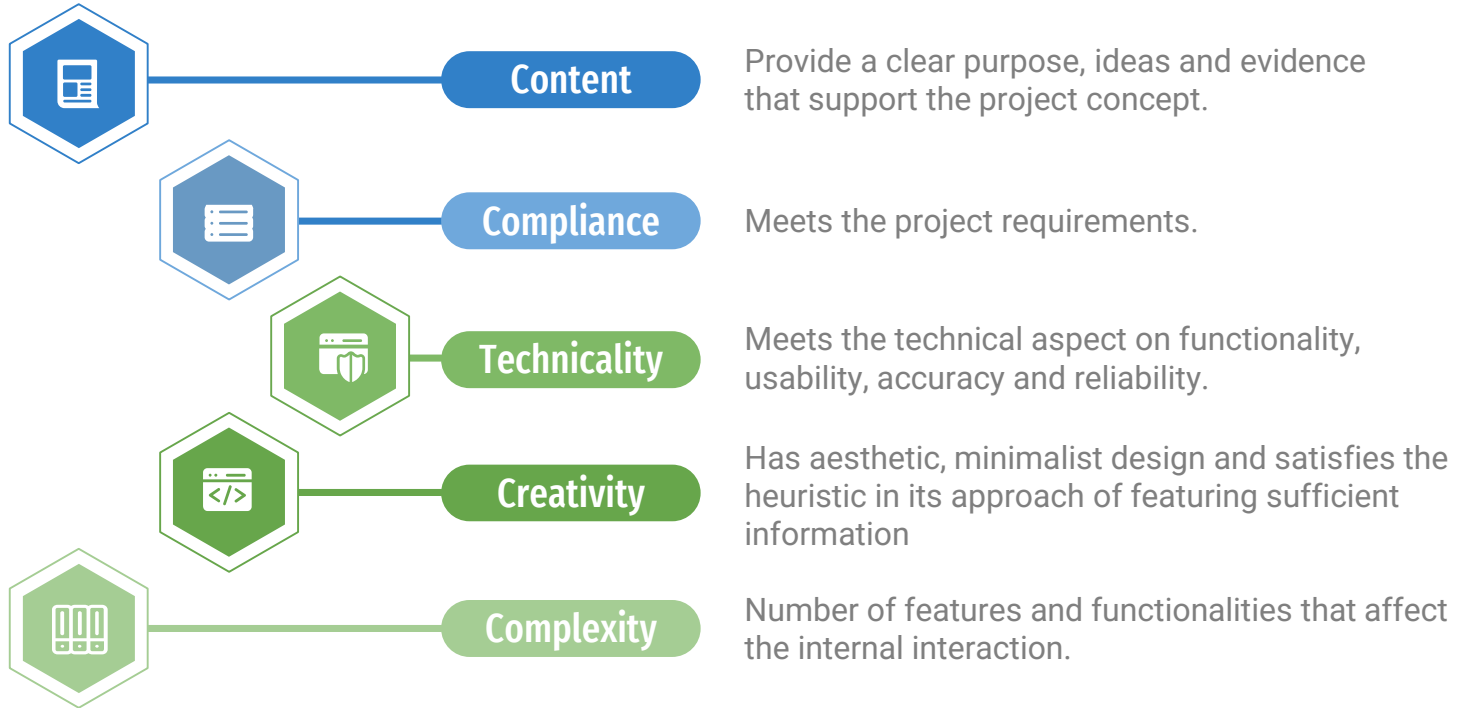

Student Research Day @UMT is an annual UMT event organized as a platform to showcase all the FYP projects. All FYP students are required to submit their abstracts.

02

Thesis Draft

The thesis is an important requirement for graduation. To ensure that the student is serious about writing the thesis, the thesis draft should be submitted to the supervisor for review.

PRESENTATION

Presentation Skill

Delivery

Presentation is delivered well and smoothly.

Appearance

Wear a proper presentation attire and comforts him/her self professionally throughout the presentation.

Technology Used

Ability to use advanced technology/techniques that have not been taught throughout the study to develop project.

Product Innovation

Commercial Potential

The project has commercial value and will be sustained in the future.

Target Market

The project is creative and designed for a well-defined target user.

REPORT

Abstract

(solid English & Malay abstracts)

Chapter 1

Introduction

Chapter 2

Literature Review

Chapter 3

Methodology

Chapter 4

System Requirement & Analysis

Chapter 5

System Design

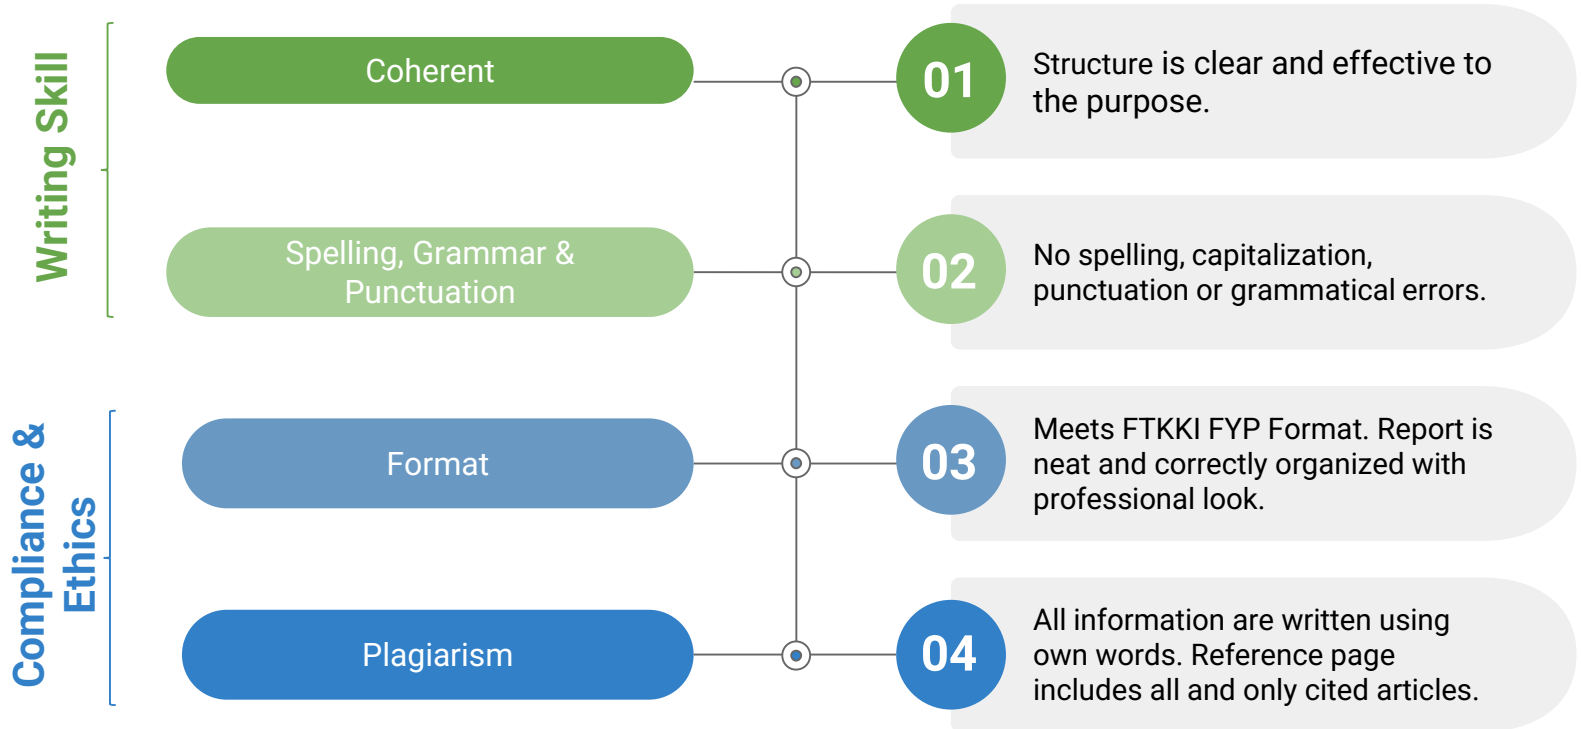

Chapter 6

System Implementation

Chapter 7

Conclusion

GUIDELINES

Wear a proper presentation attire.

Arrive 5-10 minutes before the start of the presentation.

Presentation is approximately 20 minutes long. The time for Q&A depends on room's assessor panels.

Presentation should be a polished, carefully planned performance.

01

INTRODUCTION

Start by giving a little background on the project. Then move onto the main aims.

02

OBJECTIVES & SCOPE

What objectives have been set out to achieve? Define also the project's scope.

03

USE CASE/ SYSTEM ARCHITECTURE

Describe briefly the overall behavior of the system.

04

CRUD MATRIX & METHODS

Present CRUD matrix and describe special algorithms, methods or techniques used for the processes.

05

DEMO

Show the panels something of the project.

06

FUTURE WORK

Will the project be continued in any form? If so, how?

**How to Have Meaningful
Relationship with Your Supervisor?**

Take a Mature Approach

Being prepared for **all** meetings.

Prepare

Notify

Inform your SV of any setbacks or challenges you may be experiencing even if they are personal.

Be Honest

Take Notes

Send a follow-up WhatsApp message after the meeting thanking them for their time

Follow Up

Resilience

What the main topic of the discussion will be at the next meeting?

So that you can follow up on some of the key suggestions

Learn to stand back up when you've been knocked down

THANK YOU
